ABSTRACT OF THE DISCLOSURE

The purchaser client of the corporation or the
individual who is the contract member participates in
the marketplace that is constructed in the server and
5   requests for the commerce transaction of the commodity
purchase. When the desired purchase commodity is not
obtained in the marketplace, the server requests other
marketplace with which the mediation contract is
concluded for the commerce transaction of the commodity
10   purchase by attaching the credit guarantee to the
purchaser. With respect to the mediation with other
marketplace, the credit enquiry is conducted based on
the purchase history of the purchaser in his own
marketplace and, when a predetermined estimation
15   standard is satisfied, the commerce transaction of the
commodity purchase is requested to other marketplace
with the credit guarantee information.
